+3.7% vs 2025
Average rate J$53.8 per kWh, +2.0% on 2025

RT40 TO RT70
124.5 GWh
−7.2% vs budget
−0.9% vs 2025; Alcoa alone −7.1 GWh vs budget

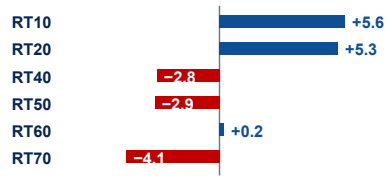

ACCOUNTS BILLED AT ZERO
227 of 7,711
224 in September
113 at zero for 12+ months; none at $0 revenue

BY RATE CLASS (GWH, BEFORE PREPAID)

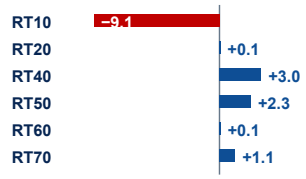

Rate class	October					Forecast (LE)		Revenue vs 2025
	Actual	2025	vs 2025	Budget	vs budget	LE	vs LE	
RT10 Residential	106.2	103.4	+2.7%	100.6	+5.5%	115.3	−7.9%	+5.3%
RT20 Small commercial	60.8	57.6	+5.5%	55.5	+9.5%	60.7	+0.1%	+7.3%
RT40 Commercial	70.8	68.4	+3.5%	73.6	−3.8%	67.8	+4.4%	+6.5%
RT50 Large commercial	30.9	27.0	+14.5%	33.8	−8.5%	28.6	+7.9%	+6.4%
RT60 Street lighting	3.4	3.4	0.0%	3.2	+6.3%	3.3	+2.3%	+1.3%
RT70 Industrial	19.4	26.9	−27.9%	23.6	−17.6%	18.3	+6.2%	−25.7%
Total system	**291.5**	**286.7**	**+1.7%**	**290.2**	**+0.4%**	**294.0**	**−0.9%**	**+3.7%**

Budget and 2025 are shown without prepaid; the LE includes it. Prepaid is not yet loaded for October (September carried 3.1 GWh). With that added, RT10 is −6.0 GWh (−5.2%) against the LE and the system +0.6 GWh (+0.2%). The October 2025 base includes the late-October storm.

VARIANCE VS BUDGET (GWH)

VARIANCE VS FORECAST, BEFORE PREPAID (GWH)

WHAT MOVED OCTOBER

1. **The mix, not the total, missed budget**
   RT10 and RT20 ran 10.8 GWh above budget and RT40 to RT70 9.6 GWh below. Without prepaid, RT10 is also 4.8% down on September, as it was last year.
2. **Alcoa billed 259 MWh against a budget of 7,349**
   Down from 9.0 GWh in July to 1,165, 616 and 259 MWh as its own generation took over; not expected back.
3. **Hotels 17.2 GWh against 20.4 budget**
   −3.2 GWh. Half Moon Bay, Playa Hall and Seawind Key are still a fraction of last October.
4. **Against the forecast, RT10 is the miss**
   The LE has RT10 at 115.3 GWh, +0.6% on September. It fell 4.8% before prepaid, and last year it fell 4.0%. RT40 to RT70 beat the LE by 6.5 GWh.
5. **Accounts churned**
   Caribbean Cement and Petrojam offset (9.1 and 1.8 GWh). 40 accounts above RT10 stopped billing (234 MWh in September), 31 restarted (203 MWh) and 14 are new, including PriceSmart.

BILLED AT ZERO

Billed at zero kWh	Oct 2026	Sep 2026	Oct 2025
Accounts (RT20 and above)	227	224	188
of which RT20 / RT40 to RT70	185 / 42	180 / 44	150 / 38
RT10 customers at zero	58,886	59,039	51,144

195 of the 227 have been at zero for 2+ months, 151 for 6+ and 113 for 12+. 219 are Active and 219 are on a shared minimum-bill tariff, so none bills $0; the question is whether the meter is being read. RT10 zero customers are 15% above October 2025, down from 176,916 in December.

DATA FLAGS

- Alcoa's rate fell to J$43.4/kWh from J$55.9 over July to September. Its demand charges are provisional.
- Credits on rows the load excludes as not billed total -175 MWh, led by a residential account (-100 MWh) and Caribbean Maritime University (-96 MWh). Confirm with billing whether they are reversals.
- RT10 net-export accounts fell to 857 from 1,026 but their export rose to 331 MWh from 259.

Not yet in these figures. October prepaid and the prepaid-tagged adjustments (about 3.1 GWh and J$180M a month at September's level) are not loaded, so system sales will rise when they are.
