2,429 GWh
−4.7% vs 2025
+1.5% vs budget; −121 GWh on January to September 2025

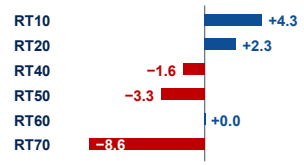

YEAR TO DATE REVENUE
J$127.8 bn
−1.5% vs 2025
Average rate J$52.6 per kWh, +3.4%

BY RATE CLASS

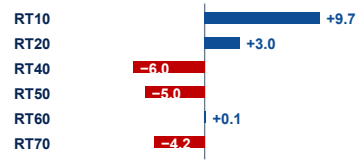

Rate class	September (GWh)					January to September			Sept revenue vs 2025
	Actual	2025	vs 2025	Budget	vs budget	GWh	vs 2025	vs budget	
RT10 Residential	114.6	110.3	+3.9%	104.8	+9.3%	882.6	−3.0%	+3.4%	+4.8%
RT20 Small commercial	60.6	58.3	+4.0%	57.6	+5.2%	475.8	−3.0%	+3.1%	+3.6%
RT40 Commercial	67.3	68.9	−2.4%	73.3	−8.2%	569.8	−5.9%	−2.6%	−0.2%
RT50 Large commercial	30.3	33.5	−9.8%	35.3	−14.2%	259.5	−9.6%	−5.3%	−6.1%
RT60 Street lighting	3.4	3.4	+0.1%	3.3	+3.0%	27.5	−9.5%	+1.6%	−0.7%
RT70 Industrial	18.6	27.3	−31.7%	22.9	−18.5%	213.9	−5.7%	+11.0%	−18.5%
Total system	**294.8**	**301.7**	**−2.3%**	**297.3**	**−0.8%**	**2,429.0**	**−4.7%**	**+1.5%**	**+0.9%**

RT10 includes prepaid customers. Revenue is net of GCT. January and February budgets were set equal to actuals.

SEPTEMBER CHANGE VS 2025 (GWH)

SEPTEMBER VARIANCE VS BUDGET (GWH)

WHAT MOVED SEPTEMBER

1. **Against budget, September was 2.5 GWh short**
   RT10 and RT20 ran 12.7 GWh above budget while RT40 to RT70 ran 15.2 GWh below. Alcoa and Caribbean Broilers account for 8.3 GWh of that commercial gap. Year to date, sales are 35.3 GWh (1.5%) above budget.

2. **Residential grew in the month**
   RT10 rose +3.9% to 114.6 GWh and RT20 +4.0%. Prepaid grew 19.5% to 3.1 GWh on 18,541 customers. Year to date RT10 is still 3.0% below 2025 as the parishes hit by Hurricane Melissa recover.

3. **Alcoa is the largest single swing**
   Its main supply account billed 0.6 GWh against 6.9 a year ago, 6.3 GWh or 73% of the RT70 decline of 8.6 GWh, as it moves to self-generation. Its August and September demand charges are provisional and could come down by up to J$175 million.

4. **Caribbean Cement dipped**
   9.1 GWh against 10.8 a year ago. The 1.7 GWh fall is 52% of the RT50 decline of 3.3 GWh, although it remains ahead of budget year to date.

5. **Billing timing moved about 1.6 GWh**
   Caribbean Broilers was billed for two periods in August (3.4 GWh against a normal 1.7) and only a stub in September (0.08 GWh). Adjusted, September sales are 296.4 GWh, 1.8% below last year.

6. **Rate carried revenue**
   The average rate rose 3.3% in the month and 3.4% year to date, so revenue is down 1.5% year to date on volume down 4.7%.

Outlook. Alcoa's lost grid load is not expected to return and should be carried through year end in the fourth quarter forecast. Recovery in the parishes hit by Hurricane Melissa and in hotels is the main upside to year-end volume.

Customer-billed basis. Variances are against the same period of 2025 and the approved budget.
